PROFESSIONAL SUMMARY

Backend developer with 2.5 years of experience building REST APIs and server-side applications. Proficient in Node.js and TypeScript with hands-on experience in PostgreSQL database management. Comfortable working with cloud services and version control. Looking to grow within a collaborative engineering team.

WORK EXPERIENCE

Backend Developer — Konga Online Shopping Ltd, Lagos

January 2023 – Present

- Built and maintained REST APIs using Node.js and Express serving over 50,000 daily active users
- Designed PostgreSQL database schemas and wrote optimised queries using Sequelize ORM
- Implemented JWT-based authentication and role-based access control across internal services
- Migrated legacy API endpoints to TypeScript, reducing runtime errors by approximately 30%
- Collaborated with frontend team to define and document API contracts using Postman

Junior Backend Developer — Andela (Contract), Remote

June 2022 – December 2022

- Developed internal tools and microservices using Node.js
- Worked with MySQL and basic Redis caching for performance improvement
- Participated in code reviews and daily standups in an Agile environment

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Runtime/Frameworks: Node.js, Express.js (familiar with Bun but limited production experience)

Databases: PostgreSQL, MySQL, basic Redis

Tools: Git, Postman, Linux CLI, basic Docker knowledge

Other: REST API design, JWT, Zod validation, basic CI/CD pipelines

EDUCATION

B.Sc. Computer Science — University of Lagos

2018 – 2022 | Second Class Upper

PROJECTS

PayTrack — A personal finance tracking API built with Node.js, PostgreSQL, and JWT auth. Includes category tagging, monthly summaries, and CSV export.

QuickMenu — Restaurant ordering backend with real-time order updates using WebSockets and Redis pub/sub.
